TRADE CREDIT INSURANCE WITH ATRADIUS

Your receivables are likely your largest uninsured asset.

Find out how safe your top 20 customers really are. Free. No obligation.

Why this matters now

- **Slow and non-payment is climbing** across industries.
- **One default can hurt.** Receivables can be up to 40% of a company's assets.
- **Concentration is common.** A few buyers often carry most of your revenue.
- **The world is volatile.** Tariffs, sanctions, conflict, and supply chain shocks change how buyers pay.

$80,000
of new sales to make up one unpaid $10,000 invoice at a 12.5% margin

Up to 90%
of an insured invoice can be covered, per Atradius

What it does for you

Grow	Borrow	Sleep
Say yes to a large new customer. Example: $1,000,000 of new sales at a 10% margin is $100,000. After a $30,000 premium, the net gain is $70,000.	Banks may lend against receivables they once excluded. Example: borrowing capacity rising from $937,500 to $1,350,000, an increase of $412,500, subject to lender approval.	Early warning on buyers whose finances are weakening, plus professional collections if a customer does not pay.

Your free top 20 buyer risk analysis

- A clearer view of the financial strength of your key customers
- Early warning on buyers showing signs of deteriorating credit
- An honest view of whether trade credit insurance fits your risk management

How it works

1. Send us your top 20 buyers (name, location, annual sales to them, payment terms).
2. Atradius reviews them with its credit intelligence.
3. We walk through the results together. You decide what, if anything, to do next.

Good to know

- **Best fit:** businesses selling on credit terms with roughly $5 million or more in annual sales.
- **Covered:** buyer insolvency and protracted default; political risk where included. **Not covered:** commercial disputes.
- **Cost:** set on your sales and buyer mix and confirmed only by an Atradius quote. Policies are typically sized from about $10,000 in annual premium.
